Patents 1 - 10 on **updating sequence table fragment**. (0.13 seconds)

Sort by relevance | [Sort by date \(new first\)](#) | [Sort by date \(old first\)](#)

Dynamic allocation for efficient management of variable sized data within a ...

US Pat. 6226728 - Filed Apr 21, 1998 - Intel Corporation

The characteristics of flash memory tend to encourage **updating** as little as possible in ... A new **sequence table fragment** header is written with a status of ...

Updating a file in a fragmented file system

US Pat. 6954765 - Filed Dec 30, 2000 - Intel Corporation

All **sequence** tables from the original root to the new root are deleted 338. The truncated data **fragment** is linked to its parent **sequence table** by **updating** ...

Increased reliability of data stored on flash memory in applications

US Pat. 6839823 - Filed Sep 29, 2000 - Intel Corporation

11 12 multiple instance object requires **updating** the lookup tables in step 1270. ... If the current **sequence table fragment** is not full, processing can ...

Method and apparatus to permit adjustable code/data boundary in a ...

US Pat. 6401160 - Filed Mar 31, 1999 - Intel Corporation

If the current **sequence table fragment** is not full, processing can continue ... Creating and **updating** single instance objects and multiple instance objects ...

Method and apparatus for video signal encoding, decoding and monitoring

US Pat. 5319453 - Filed Jun 22, 1989 - Airtrax

At step 1238, an encoded **fragment** is built up tlon about *e broadcast of ... is read in This information must be stored in an airing **table** and a **sequence**. ...

Updating link state information in networks

US Pat. 5128926 - Filed Mar 21, 1990 - Digital Equipment Corporation

5 is 12, but the **sequence** number of **fragment** 2 is 7, ... packet storage according to computing a routing **table** using Dijkstra's algorithm), the invention. ...

Continuously available database server having multiple groups of nodes, each ...

US Pat. 5423037 - Filed Nov 8, 1994 - Teleserve Transaction Technology AS

In particular, the repaired node goes through a process of rebuilding its data **table fragment** replicas, and sends status messages to all the other nodes as ...

[APPLICATION] Storing code in fragments

US Pat. 10836682 - Filed Apr 30, 2004

For example, **sequence table** 1404 may be created to point to one or more level ... By storing code objects in a fragmented manner, management and **updating** of ...

Continuously available database server having multiple groups of nodes with ...

US Pat. 5555404 - Filed May 26, 1995 - Telenor AS

In particular, the repaired node goes through a process of rebuilding its data **table fragment** replicas, and sends status messages to all the other nodes as ...

Independent distributed database system

US Pat. 6446092 - Filed Mar 15, 1999 - PeerDirect Company

Any **fragment** that fails its integrity check is treated as if it ... 55 It will be appreciated that according to the **sequence** of steps described above only ...
